# KANSAS STATE BOARD OF TECHNICAL PROFESSIONS

The Kansas State Board of Technical Professions is utilizing the following guidelines as they pertain to K.A.R. 66-10-9(b)(2), which states that engineering work shall be directly supervised and verified by a licensed professional engineer for work performed after May 1, 1988, except that direct supervision of a licensed professional engineer is not required of the employees of any person, firm or corporation not offering services in the technical professions to the public, although verification by the applicant's supervisor is still required.

## GUIDELINES FOR DIRECT SUPERVISION

It is the position of the Kansas State Board of Technical Professions that the phrase "direct supervision" shall mean that there are clear indications of phased interaction between the professional acting as the supervisor and the I.E. (Intern Engineer). Such interaction should include: (1) a pre-job/design conference, (2) a job/design review, (3) timely job/design interaction, and (4) a post-job/design review.

While this phased interaction is not required to transpire in the same geographic location; at a minimum, the supervising professional shall review the job/design site to determine the applicability of the I.E.'s approval.

In the event that direct supervision is not available within the firm/organization, the Kansas State Board of Technical Professions may allow the job/design supervision to occur outside of the firm/organization, with a licensed P.E. of the appropriate discipline, providing the above requirements are met.
